

SWIMMING CUSTOM CATALOGUE

eco

RDP cares about the environment, so its garments are fabricated with high quality fabrics made from recycled materials that help minimize the consumption of natural resources and help keep the oceans cleaner.

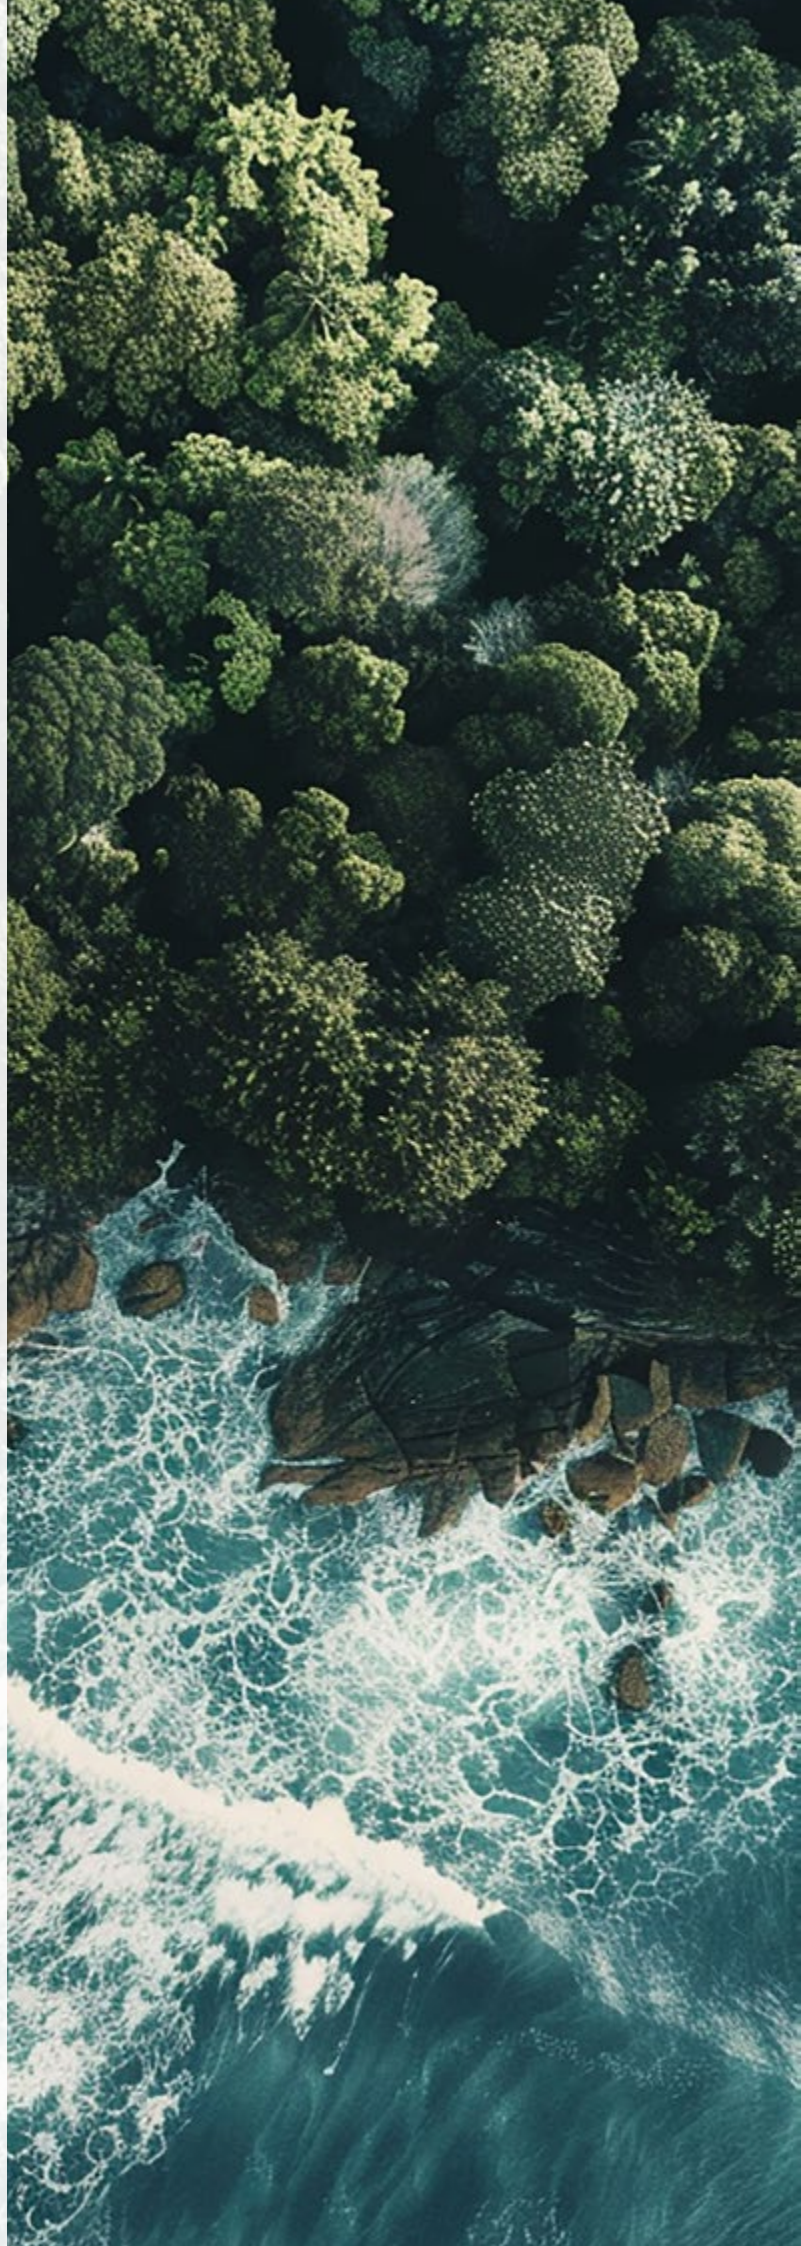

Recycled DTY - 100% Post-consumer Polyester CU816491
<http://certification.controlunion.com>
Certified to GRS

Thank you for choosing our clothes.

In RDP we take care of the environment using recycled polyester and ecological inks.

Our production is local, we fight it against slavery children and avoid CO2 emissions.

TECHNOLOGIES

ULTRA LIGHT Lightweight fabric. A lightness that provide a pleasant feeling of comfort, agility and freedom of movement.

ULTRA LIGHT Tejido ligero. Una ligereza que proporciona una agradable sensación de confort, agilidad y libertad de movimiento.

LASER CUT Made for ultimate comfort and a seamless finish.

LASER CUT Hecho para una mayor comodidad y un acabado final sin costuras.

REVOLUTIONARY ELASTICITY Fabric allows a multidimensional elastic movement, COOLMAX form a second skin, flexing following the body movements this increasing comfort.

REVOLUTIONARY ELASTICITY Tejido que permite un movimiento elástico multidimensional, COOLMAX forma una segunda piel, siguiendo los movimientos del cuerpo dando un mayor confort.

CHLORINE RESISTANT Strong resistance to chlorine and abrasion.

CHLORINE RESISTANT Fuerte resistencia al cloro y a la abrasión.

WATER REPELLENT Total fabric water repellent.

WATER REPELLENT Repele el agua para una mínima fricción.

PBT FABRIC PBT (Polybutylene Terephthalate) fabric is a polyester fiber known for its durability, chlorine resistance, and shape retention ability. These characteristics make it ideal for use in high-performance water sports. The characteristics of the DUREXTREME fabric make this swimsuit a highly resistant garment to chlorine due 20 time more to discoloration, friction, or wear of use. Its fibres provide optimal elasticity and adequate muscle compression for sports practice in addition to providing a quick drying and extremely easy maintenance.

TEJIDO PBT El tejido PBT (Polibutileno Tereftalato) es una fibra de poliéster conocida por su durabilidad, resistencia al cloro y capacidad de retención de la forma. Estas características lo hacen ideal para su uso en deportes acuáticos de alto rendimiento. Las características del tejido DUREXTREME hacen de este bañador una prenda altamente resistente al cloro, 20 veces mas resistente, tanto por decoloración, fricción o desgaste de uso. Sus fibras proporcionan una elasticidad óptima y la compresión muscular adecuada para la práctica deportiva además de proporcionar un secado rápido y un mantenimiento sumamente sencillo.

FORRO DE TELA SUBLIMADA En las prendas de baño hay posibilidad de hacer el forro sublimado con cualquier diseño, pudiendo agregar etiquetas en el forro o cualquier diseño que se le ocurra al cliente.

LINNING SUBLIMATED FABRIC In swimwear, there is the possibility of making the lining sublimated with any design, being able to add labels to the lining or any design that the client can think of.

SPECIAL PBT WTP FABRIC SPECIAL PBT WTP FABRIC The Special PBT WTP fabric is a polyester fiber with high durability, chlorine resistance and shape retention capacity.

Chlorine Resistance: maintains its integrity and color even after prolonged exposure to chlorine.

Elasticity and Recovery: Offers excellent elasticity, allowing a comfortable and secure fit that does not restrict movement. In addition, it has a great recovery capacity, returning to its original shape without stretching with repeated use.

Durability: This fabric is highly resistant to wear, making it perfect for a sport as demanding as water polo. It does not wear out easily, even with constant friction with rough surfaces and intense physical contact during matches.

Quick Drying: reduces the time the athlete spends with the wet suit, increasing comfort and decreasing the risk of skin irritation.

Color Retention: Maintains vibrant colors and does not fade easily with exposure to sun and chlorine, ensuring team uniforms look professional and in good condition for longer.

Comfort and Fit: Softness and its ability to adapt to the body provide superior comfort. This anatomical fit is crucial for the freedom of movement needed in water polo.

Increased Hydrodynamics: The tight fit and soft texture of PBT reduce water resistance, allowing players to move faster and with greater agility.

Endless Durability.

The characteristics of the DUREXTREME fabric make this swimsuit a highly resistant garment to chlorine due 20 time more to discoloration, friction, or wear of use. Its fibres provide optimal elasticity and adequate muscle compression for sports practice in addition to providing a quick drying and extremely easy maintenance.

Waterpolo garments are made with Special WTP PBT fabric, both the lining and the outer part of the garment, to ensure the quality and characteristics of the garment.

TEJIDO PBT ESPECIAL WTP El tejido PBT Especial WTP es una fibra de poliéster con alta durabilidad, resistencia al cloro y capacidad de retención de la forma:

Resistencia al Cloro: mantiene su integridad y color incluso después de una exposición prolongada al cloro.

Elasticidad y Recuperación: Ofrece una excelente elasticidad, permitiendo un ajuste cómodo y seguro que no restringe el movimiento. Además, tiene una gran capacidad de recuperación, volviendo a su forma original sin estirarse con el uso repetido.

Durabilidad: Este tejido es altamente resistente al desgaste, lo que lo hace perfecto para un deporte tan exigente como el waterpolo. No se desgasta fácilmente, incluso con el roce constante con superficies rugosas y el contacto físico intenso durante los partidos.

Secado Rápido: reduce el tiempo que el atleta pasa con el traje mojado, aumentando la comodidad y disminuyendo el riesgo de irritaciones en la piel.

Retención del Color: Mantiene los colores vibrantes y no se decolora fácilmente con la exposición al sol y al cloro, lo que garantiza que los uniformes de equipo se vean profesionales y en buen estado durante más tiempo.

Confort y Ajuste: La suavidad y su capacidad para adaptarse al cuerpo proporcionan un confort superior. Este ajuste anatómico es crucial para la libertad de movimiento necesaria en el waterpolo.

Mayor Hidrodinámica: El ajuste ceñido y la textura suave del PBT reducen la resistencia al agua, permitiendo a los jugadores moverse más rápido y con mayor agilidad.

Durabilidad infinita

Las prendas de waterpolo son fabricadas con tejido PBT Especial WTP tanto el forro como la parte exterior de la prenda para así asegurar la calidad y características de la prenda.

Las características del tejido DUREXTREME hacen de este bañador una prenda altamente resistente al cloro, 20 veces mas resistente, tanto por decoloración, fricción o desgaste de uso. Sus fibras proporcionan una elasticidad óptima y la compresión muscular adecuada para la práctica deportiva además de proporcionar un secado rápido y un mantenimiento sumamente sencillo.

DIFFICULT TO GRAB The fabrics designed for water polo ensure that players have maximum freedom of movement and protection against grabbing attempts. These features not only improve the player's performance but also contribute to the integrity of the game.

DIFÍCIL DE AGARRAR El tejidos diseñados para waterpolo asegura que los jugadores tengan la máxima libertad de movimiento y protección contra intentos de agarre. Estas características no solo mejoran el rendimiento del jugador sino que también contribuyen a la integridad del juego.

CUSTOM PRODUCTS

INITIAL ORDERS	The minimum, initial order, manufacturing will be 7 units of each model. If they do not reach at the minimum, the following will apply: from 4 to 6 units, a surcharge of 20% on rate
REPLACEMENTS	The replacements of more than 3 units per model, will not have additional increment. The replacements of 2 units for model, will be applied the surcharge of 20% on rate and for a single unit 50% surcharge will be applied. As long as there is no change in the design.
DELIVERY TIME	The delivery time will be 5 weeks, which may vary depending on the models to be customized. Up to 6 models the delivery time should be 6 weeks. Up to 7 to 9 models the delivery time should be 7 weeks. Up to 9 models will be 8 weeks. The accounting of this term will begin when: We have the confirmation by mail of the definitive design, excel providing the sizes for each model and the payment of 1st 50% of the budget has been made, which will mean the confirmation of the same.
TIME FOR HOLIDAYS	“From December 21 to January 7 / The 10 days of Holy Week and throughout the month of August: All manufacturing, personalization, will be paralyzed. These days are not counted within the delivery period.”
FREIGHT	Orders, with standard service and delivery European Community will be charged 25.00 € / box
FREIGHT OBSERVATIONS	International shipments may require the payment of customs taxes. Customs commissions are unrelated to Real Deal Projects S.L. and can be requested by the administration in certain cases that Real Deal Projects S.L. does not know and whose decision will be made by the administration of the autonomous region that receives the package. SuralSport is not responsible for the amount requested by the customs administration or town councils, which must be paid by the package receiver in said autonomous communities.
SAMPLES	They will not have commercial value, they will be returned at the end of the sizing tests to place the order. The client will receive a delivery note in which the value of each unit, sample, will be 100.00 €, which will be regularized at the time of the return of the samples and check their good condition. In case of missing a unit, the customer will be billed at 100.00 €.
BUDGET	“A budget will be delivered with the final amount of the order which must be paid in the 1st 50% to start the production. The client must send by email, to contabilidad@sural sport.com , the bank proof of the deposit, facilitating in the concept the budget number and name of the team.”

DESIGNS & LOGOS

DESIGNS	A designer will be assigned to manage your order. This includes up to 3 design revisions at no additional cost. For orders over 300€, the garment design will be free of charge. However, if the order is not finalized after the design work has been completed, a 150€ 'Design' fee will apply. There is no limit on the number of colors for the garments.
LOGOS	Customer must provide logos in vectorized formats : Illustrator (.ai), Corel Draw (.cdr), Freehand (.fh) or (.eps) or (.pdf).

EXTRA COSTS

LOGOS DESIGN	If there are logos without vectoring / not drawn by the client, the logos to be vectorized by Real Deal Projects will have a additional cost of 20€ for each color of the logos.
FLUORINE COLORS	If the customer's order contains fluorescent colors. This will increase the cost by 5% on the corresponding rate. Since these inks have a higher cost.
LOGO MAKE UP	Make up and size adjustments for swim caps NET AND FIX PRICE - 30€ Make up and size adjustments for swimwear NET AND FIX PRICE - 60€
SUBLIMATED NAME	In the event that it is possible, 5€ per unit must be added to the list price.
SCREEN PRINTING	Maximum 5 names in every screen of 45 x 45 mm and the price will increase by 45€.
EMBROIDERY DISK	Cost for the embroidery Disk will be 25€ , net and fix price.
EXTRA EMBROIDERY	Maximum size of 30x30 mm. Increasing the price 1,5 € per unit
PBT LINING	This will increase the cost by 1,5€ on the corresponding Model

*** LOGOS**

Considered only 1 logo per piece. More Logos (cloro-transfer) will be increase 1€ more for each logo.

CONDITIONS DESIGN

A designer will be assigned to manage the work. We ask the client to review correctly all texts and logos that appear in the sketch. Once approved the design, RDP is not responsible of the errors.

The colors of the proposal design are not exact due to the different color settings of printers and monitors. We beg to the Customer tell us the color references (Pantone, RGB, CMYK) or provide sample physical if you have it. There will be no limit of colors in the garments.

In the event that some logo should have a specific measure or position, We ask the client to specify it. Otherwise, the pattern explained will be followed previously.

Logos and drawings must not pass between seams for reasons of clothing.

The size of the logos and forms will be adapted always to the smallest size, as You can see in the bottom image where each line corresponds to a size Distance

Up to 3 rectifications can be made without additional cost

The client must provide the vectorized logos. Possible formats: Illustrator (.ai), Corel Draw (.cdr), Freehand (.fh), (.eps) or (.pdf). The logos to be vectorized by SURAL, will have an additional cost of € 20 x color and logo.

As a general rule, the color of the zipper, of the seams and the strip will always be white or black In exceptional case and depending of the quantities, you can choose another color.

The minimum order is 7 units per model. The minimum for replacement is 4 units per model, as long as no There is no type of modification in the design.

The delivery time is 7/8 WEEKS * a from:

- ✓ **PAYMENT OF 50% OF THE BUDGET**
- ✓ **CONFIRMATION OF THE DESIGN**

As of this moment, no more will be admitted changes

* Holiday periods will not be counted within the delivery term.
